

Working together on efficient production

Experts in rotating equipment

WE CONTROL YOUR FLOW

We are Sellon

A young family-owned company with over 50 years of experience as an industrial supplier and service provider in the field of rotating equipment. With a team of around 20 dedicated employees, we work every day to increase the reliability and extend the service life of your rotating equipment.

Versatile across industries

Every industry faces its own challenges. But they all share one essential need: safe, efficient, and reliable rotating equipment. Drawing on decades of hands-on experience across diverse sectors, our specialists combine deep application and process expertise to deliver the right solution.

Pharma & Food

General industry

Maritime

(Petro) Chemical

Pulp & Paper

From standard pumps to customized solutions

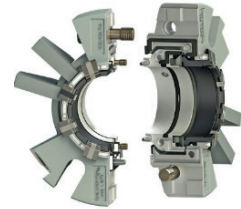

Sellon offers an extensive range of high-quality pumps and mechanical seals for applications across various industries. Additionally, we offer a wide range of maintenance products for your rotating equipment. We exclusively partner with trusted suppliers known for their quality and reliability.

Coatings

IL & MRO

Mechanical Seals

Polymer Seals

Pumps

Packing & Gaskets

Our partners

„Maximizing MTBR is at the heart of every pump overhaul we perform. By placing extra emphasis on sealing technology, we ensure your equipment delivers peak performance and reliability.“

SELLON

From maintenance to improvement – all in one hand

In addition to consulting and supplying high-quality products, we are happy to take the load off your shoulders with our complementary services. From precise seal overhauls to full maintenance of your rotating equipment, we have you covered. Discover some of the services we offer.

Pump overhaul

In our well-equipped workshop, we overhaul pumps from a wide range of brands. From quick pump repairs to complete maintenance, our skilled technicians handle every type of pump with precision. We also help you optimize your pump system to achieve maximum performance, reliability, and efficiency.

Seal system engineering

As experts in sealing technology, we provide tailored solutions for demanding processes where safety, environmental compliance, emissions, and contamination control are critical. We make use of API seal plans and gas seals, enabling us to deliver the perfect sealing solutions - from standard configurations to fully engineered custom systems.

Condition Monitoring

Our ability to respond quickly to maintenance needs makes us a trusted partner. What makes us even more valuable is our focus on planned maintenance. With Chesterton Connect, a smart and scalable monitoring solution, you can collect real-time data from your pump to continuously monitor your process and equipment and detect any deviations in time.

Seal overhaul

Mechanical seal failure is the most common reason for pump downtime. Sellon overhauls mechanical seals for nearly every industry and application. We work independently of brands, but we are proud to be the only certified Chesterton seal repair center in the Netherlands.

Van Stenis Group in a nutshell

Startflow is part of the Van Stenis Group. The name Van Stenis Group reflects the close collaboration between Luitec, Sellon, and Startflow – companies operating in the same industries, each with their own expertise. What unites us? All our products and services are focused on optimizing the “flow” within your production process.

STARTFLOW

Startflow is your industrial supplier and service provider within the process industry - from advice to installation, from engineering to assembly and maintenance of components and systems. We provide complete support in the field of process valves and pneumatic control technology.

LUI TEC

Luitec is your technical service provider specializing in compressed air systems, pumps and technical components. Looking for complete compressed air solutions? Luitec takes care of everything – from engineering and on-site installation to maintenance.

VAN STENIS SERVICES

Van Stenis Services is your maintenance provider for pumps, valves, and compressed air systems. With the combined expertise of technicians across the Van Stenis Group, we handle maintenance and troubleshoot issues to keep your installations running smoothly.
